

As the federal government has implemented layoffs and a shutdown, and as federal contracts and grants face disruption, Maryland's economy has been significantly impacted. The following economic indicators will be regularly updated as new data is made available.

In total, 2,928 initial claims were filed through the Maryland Department of Labor between November 2 and November 8, 2025, by workers employed in Maryland. This includes both (1) federal workers, filing through the unemployment insurance (UI) program that is specific to them (called Unemployment Compensation for Federal Employees, or UCFE), and (2) workers who are not federal employees, filing through the regular state UI program, such as federal contractors, other private sector workers, and state and local public sector workers.

The map below shows how claims were distributed by county of residence, though it does not include initial claims by out-of-state claimants or those whose residence information was unknown (316 claims combined). Initial claim volumes were highest in Montgomery County, Baltimore County, Prince George's County, and Baltimore City. See the [Maryland Department of Labor](#) website for more information.

A map of Maryland divided into its 43 congressional districts. Each district is labeled with a number in a white box and a population value in a black box. The districts are shaded in three colors: light gray, medium gray, and dark gray. The districts and their populations are: 6 (101,000), 20 (101,000), 39 (101,000), 48 (101,000), 101 (101,000), 357 (101,000), 146 (101,000), 42 (101,000), 9 (101,000), 27 (101,000), 12 (101,000), 18 (101,000), 17 (101,000), 58 (101,000), 113 (101,000), 5 (101,000), 25 (101,000), 30 (101,000), 357 (101,000), 237 (101,000), 411 (101,000), 122 (101,000), 311 (101,000), 357 (101,000).

Initial Federal Unemployment Insurance Claims in Maryland

The US Department of Labor (US DOL) publishes estimates of federal workers filing for unemployment insurance through the UCFE program.

Initial UCFE claims by Maryland residents for week ending Nov. 8, 2025 721 Source: US Dept. of Labor	Total initial UCFE claims by Maryland residents for Jan. 19 to Nov. 8, 2025 8,706 Source: US Dept. of Labor	Continuing UCFE claims made by Maryland residents for week ending Nov. 8, 2025 4,230 Source: US Dept. of Labor
---	--	---

721 Maryland residents filed initial UCFE claims in the week ending November 8, 2025, regardless of the state/district of their prior employment. Although initial UCFE claims have fallen from a peak of 1,357 for the week ending October 18, the number of federal claims filed remains highly elevated above typical levels. For comparison, 11 UCFE claims were filed by Maryland residents in an average week in 2024. Furloughed federal employees are eligible for unemployment insurance benefits, and the recent increase in claims has been driven in large part by the federal government shutdown (which concluded November 12, 2025).

MD Labor has received 9,753 federal claims since the new federal administration began. This total includes federal civilian and military claims by workers employed in Maryland. It also includes claims that may be currently withdrawn, that are marked fraudulent or potentially fraudulent, whose federal wages have not yet been confirmed, or that are for claimants who work outside Maryland and need to be referred to another jurisdiction. This number is, therefore, higher than the total initial UCFE claim figure from US DOL.

According to US DOL, Maryland residents filed 8,706 initial UCFE claims between January 19 and November 8, 2025. Maryland residents filed 4,230 continuing UCFE claims for the week ending November 8, 2025 (reflecting ongoing unemployment in the prior seven days). This is elevated from 2024, when Maryland residents made an average of 122 continuing UCFE claims each week. More information is available on the [US Department of Labor](https://www.dhs.gov/eis-a-101) website.

Initial Federal Unemployment Insurance Claims by Maryland Residents, Week Ending 1/25/25 to 11/08/25

Initial State Unemployment Insurance Claims in Maryland

US DOL publishes data on state unemployment insurance claims, which includes unemployment insurance claims filed by federal contractors, other private sector workers, and state and local public sector workers.

Initial state UI claims filed by Maryland residents for week ending Nov. 8, 2025 2,793 Source: US Dept. of Labor	Total initial state UI claims filed by Maryland residents, Jan. 19 to Nov. 8, 2025 112,187 Source: US Dept. of Labor	Continuing state UI claims made by Maryland residents for week ending Nov. 8, 2025 28,291 Source: US Dept. of Labor
---	---	--

2,793 Maryland residents filed regular state unemployment claims in the week ending November 8, 2025, according to data from US DOL. These numbers are above 2024 levels; for the week ending November 9, 2024, Maryland residents filed 2,324 initial claims.

Between January 19 and November 8, 2025, a total of 112,187 initial claims were filed by Maryland residents. Not all of these claims may be approved. Data from US DOL show that 28,291 continuing claims were made by Maryland residents in the week ending November 8, 2025 (reflecting ongoing unemployment in the prior seven days). This is elevated from one year prior; for the week ending November 9, 2024, there were 21,291 continuing claims made by Maryland residents. More information is available on the [US Department of Labor](https://www.dhs.gov/eisapostings/initial-claims) website.

Frequently Asked Questions About UI Claims Data

Q: Why is some data reported by state of filing and some by state of residence?

A: Data on unemployment insurance claims comes from several sources. County-level information on initial claims is reported by MD Labor and is based on detailed information available by claimants filing in Maryland. US DOL reports claims through two reports from the Employment and Training Administration (ETA): the ETA 538 report and the ETA 539 report. The ETA 538 report contains information on initial claims filed in each state and underlies the weekly press release from US DOL on Thursdays at 8:30 a.m. The ETA 539 report is updated later and reports claims by state of residence. Therefore, initial claims data for Maryland in the ETA 539 report will differ from advance claims in the ETA 538 report or county-level data reported on MD Labor's website. This tracking document contains information on claims from MD Labor and the ETA 539 report.

Q: What is the difference between initial and continuing claims?

A: This tracking document contains information on both initial claims and continuing claims. After separating from their previous employer, a worker files an initial claim. This is the first step in the process of receiving unemployment insurance benefits. After one week, if the claimant is still out of work and has completed all applicable reemployment activities, a claimant files a continuing claim to claim benefits for that week of unemployment. Claimants may make additional continuing claims in future weeks.

While initial claims and continuing claims often move in tandem, they are not identical. For example, if an initial claim is not approved, it cannot be carried forward as a continuing claim, and some workers filing continuing claims may find a new job and stop filing in future weeks.

Q: Monthly jobs reports also cover the unemployment rate. Is this the same data?

A: No. Each month, the Bureau of Labor Statistics (BLS) releases data on Maryland's economy, including the unemployment rate. Although BLS uses data on continuing claims in Maryland as part of their modeling process, the monthly unemployment rate is different from the data presented in this document.

To count as unemployed, a Maryland resident needs to not have a job and be actively looking for work or be on a temporary layoff from their current job. However, not all unemployed Marylanders are receiving unemployment insurance benefits. Some unemployed Marylanders may have fully exhausted their unemployment insurance benefits and still be searching for a job. Additionally, some Marylanders may not qualify for unemployment insurance benefits because they did not lose a job. For example, a recent graduate who does not have a job but is actively searching for one would count as unemployed.

Furthermore, not all Marylanders receiving unemployment insurance benefits count as unemployed. For example, some Marylanders receive unemployment insurance benefits if they have experienced a significant reduction in their work hours. For the purposes of the monthly unemployment rate from BLS, these workers count as currently having a job and therefore are not treated as unemployed.
